Delivering delightful and memorable experiences across mobile and web to drive growth for teams

Experience

Pikkit

Design Engineer I 2026 - Present

- Continuing to lead all design initiatives across Pikkit features on mobile (both iOS and Android) and web
- Contributing to production changes to polish and refine final 5-10% of product before shipping to end users
- Owning small data-driven product changes from start to finish and A/B testing to validate assumptions
- Owning repo architecture to ensure consistency and hygiene across components and devices/platforms

Growth & Product Design I 2022-2026

- Worked closely with Product, Marketing, and Engineering teams to take all product design efforts from start to across the finish line
- Owned the design language, branding, and experience of all Pikkit products on mobile and web
- Lead holistic overhaul of our design system to improve efficiency with production handoff, establishing reusable standards for components, colors, icons, and typography
- Launched and owned 3 years of Pikkit Year in Review
- Launched a brand new website to boost SEO
- Assisted in incremental product changes for existing features
- Introduced a design system for all screens within Figma

Bally Design

Head of Marketing I 2020 - 2022

- Overlooked all internal and external marketing efforts
- Drove pipeline for the sales team using multiple channels
- Stewarded brand presence through different social media platforms and touch points facing current and potential customers
- Increased social media following by 140% in 7 months
- Nurtured Bally Design's relationships through engagement campaigns and cross-selling
